

U.S. Strikes Iran Again as Peace Talks Hang by a Thread

The United States military carried out fresh "self-defense" strikes overnight Monday into Tuesday, targeting Iranian missile launch sites and boats attempting to lay mines around the Strait of Hormuz — the latest jolt to a weeks-old ceasefire that both sides are still nominally trying to preserve.

U.S. Central Command confirmed the action early Tuesday, saying American forces acted "to protect our troops from threats posed by Iranian forces." CENTCOM spokesman Tim Hawkins said targets included missile launch facilities in the Bandar Abbas area and Iranian vessels trying to emplace mines in the strategically vital waterway. Iranian state television separately reported blasts around Bandar Abbas, a city home to a major military port on the strait. A pro-government Iranian news

outlet reported four Revolutionary Guard troops were killed in the strikes on boats. The attack came just hours after Iranian negotiators had arrived in Doha for talks with Qatari mediators coordinated with Washington — a positive diplomatic signal that was quickly overshadowed. U.S. Secretary of State Marco Rubio, traveling in India, acknowledged the collision of diplomacy and firepower, saying talks could take "a couple of days" to resolve and that the Strait "has to be open — one way or the other." Fox News, citing senior U.S. officials, reported the Iran deal was "95% there," though key disputes over language on Iran's nuclear program and the lifting of sanctions have stalled finalization.

President Trump, speaking on Memorial Day at Arlington National Cemetery, reiterated that Tehran "will never have a

nuclear weapon" and insisted any deal must be a "great and meaningful" one — or the U.S. would return to active combat "bigger and stronger than ever before." His administration is pushing a two-phase framework: first reopening the Strait, then tackling the nuclear file over a 30-to-60-day period.

Iranian state-linked media framed Tuesday's strikes as a ceasefire violation. Iran has not officially commented on the latest action, but a senior Iranian official told state media there "will be no retreat" on the nuclear issue. Markets, however, continued to price in a deal: oil futures dropped more than five percent on optimism that the Strait could soon reopen, even as the exchange of fire reinforced how fragile the path to peace remains.

Dorchester Elementary School News & Events

Field Day Is This Friday, May 29 — Rain Date June 5

Dorchester Field Day is scheduled for this Friday, May 29! This is one of the most anticipated outdoor events of the school year. If the weather doesn't cooperate, the official rain date is Friday, June 5. Students in all grades participate in outdoor activities and team competitions. Check the school's official calendar at des.woodcliff-lake.com for any last-minute updates.

End-of-Year Events: Band/Chorus Concert, Board Meeting, and Last Day Approaching

The final stretch of the school year is packed with important dates for Dorchester families:

- June 9 (Tue) at 9:00 AM: PFA Meeting
- June 9 (Tue) at 6:00 PM: Band/Chorus Concert
- June 10 (Wed) at 7:30 PM: WCLEF Meeting
- June 11 (Thu) at 5:00 PM: Board Meeting
- June 18 (Thu): End of Trimester 3, Last Day of School (12:30 PM dismissal), and Trimester 3 Report Cards available in PowerSchool at 1:00 PM

Families are encouraged to mark these dates on their calendars. The Band/Chorus Concert on June 9 is open to all and celebrates the musical achievements of students across grades.

Claude Code Surges in Developer Adoption as Cursor and Copilot Feel Pressure

Anthropic's Claude Code has achieved six-fold growth in workplace adoption between April 2025 and January 2026, according to the JetBrains Developer Ecosystem Survey 2026 — and 46% of senior developers with over ten years of experience now prefer it over all other AI coding tools. GitHub Copilot, which once commanded 67% of the professional developer market, has seen its share fall to 51% per the Stack Overflow Developer Survey.

Cursor 3.3, released this month, now adds "Bugbot" — an in-editor agent that autonomously triages and fixes bugs, with Cursor reporting around 78% self-resolution. Meanwhile, OpenAI's Codex has introduced multi-day automations allowing code jobs to run for hours or even days without supervision. Claude Code's default model is Claude Opus 4.7, while Cursor 3.3 defaults to Claude Sonnet 4.6. Most power teams are combining all three tools: Cursor for daily feature work, Claude Code for complex architectural changes, and Codex for automated background workflows.

GitHub Copilot Moves to Usage-Based Billing June 1

GitHub is transitioning Copilot from flat-rate request-based billing to usage-based AI credit pricing on June 1, 2026. The Pro plan (\$10/mo) and Pro+ plan (\$39/mo) keep their prices, but compute costs for autonomous agents will now draw from credit pools rather than flat subscriptions. A new Copilot Max tier is also being added for users with heavy individual workloads. Analysts say the shift reflects the dramatically higher inference costs of agentic AI tools — which read repos, run tests, and spin up cloud workspaces — compared to the original autocomplete-only Copilot.

Russia Threatens 'Systematic Strikes' on Kyiv, Lavrov Warns Rubio

Russia announced plans for new mass attacks on Kyiv, including strikes on "decision-making centers," just days after a devastating hypersonic missile barrage on May 24 that killed at least two people, injured more than 87, and damaged around 300 sites in the capital — including nearly 150 residential buildings and the Kyiv Municipal Opera and Ballet Theater.

Russian Foreign Minister Sergey Lavrov phoned Secretary of State Marco Rubio on May 25, warning of the impending strikes and urging the U.S. to ensure evacuation of its diplomatic personnel from Kyiv. The EU vowed to keep its diplomats in place. Belarus's exiled opposition leader Sviatlana Tsikhanouskaya arrived in Kyiv for her first official visit, a show of solidarity following the attack.

On the legal front, President Vladimir Putin signed a law authorizing the use of military force abroad to "protect Russian citizens" facing arrest or prosecution by foreign nations — a move critics call a pretext for further aggression.

Ebola Outbreak Threatens 10 African Countries as Cases Spill into Uganda

Africa is racing to contain a fast-spreading Ebola outbreak that has already claimed hundreds of lives primarily in eastern Congo and is now threatening to spread across ten countries as infections spill into neighboring Uganda. Red Cross workers have been burying victims at the Rwampara Cemetery in Congo while international health authorities scramble to coordinate a response.

The outbreak has raised alarms among global health officials, who fear the region's fragile healthcare infrastructure could allow the virus to gain a devastating foothold. A New York doctor who survived Ebola more than a decade ago publicly expressed concern for healthcare workers on the front lines of the current crisis.

Trump Honors Fallen at Arlington on Memorial Day, Touts Iran War Record

President Trump marked Memorial Day 2026 at Arlington National Cemetery alongside Vice President JD Vance and Defense Secretary Pete Hegseth, laying a wreath at the Tomb of the Unknown Soldier and delivering remarks to Gold Star families and veterans. Speaking at the Memorial Amphitheater — his fifth such ceremony — Trump honored what he called "13 wonderful souls" lost during the U.S. military's war with Iran, while reiterating that Tehran "will never have a nuclear weapon."

Trump also took a moment to note the day's alignment with the nation's 250th anniversary, calling it more significant than even the World Cup and the Olympics. The solemn ceremony was preceded by an early-morning Truth Social post in which Trump wished a "Happy Memorial Day to all, including the Dumocrats," blending patriotic messaging with political attacks — a pattern that has come to define many of his national holidays.

California Chemical Tank Emergency: Major Explosion Risk 'Off the Table' but Threat Remains

Tens of thousands of Southern California residents were evacuated after a malfunctioning chemical tank at GKN Aerospace in Garden Grove overheated and threatened to explode. Officials said Monday that the threat of a massive BLEVE (boiling liquid expanding vapor explosion) was "off the table" after overnight operations to cool the 7,000-gallon tank of methyl methacrylate — a highly volatile substance used in plastics production — but

warned that a small explosion or toxic leak remained possible.

Orange County declared a state of emergency and roughly 50,000 residents were under evacuation orders at the height of the crisis. Fire officials said they were still confirming whether liquid chemical remained in the tank and could leak out.

Chaos Outside Newark ICE Detention Center as Hunger Strike Sparks Protests and Lawmaker Confrontations

A chaotic scene erupted outside Delaney Hall, a 1,000-bed ICE detention facility in Newark, New Jersey, as protesters clashed with armed, masked federal agents on Monday — the culmination of days of escalating tension tied to a hunger and labor strike launched by roughly 300 detainees on Friday.

Detainees launched the strike to protest what attorneys describe as spoiled food, overcrowded rooms, cold showers, and lack of medical care. New Jersey Governor Mikie Sherrill, Sen. Andy Kim, Sen. Cory Booker, and other Democratic lawmakers visited the facility but were denied entry. Sherrill vowed to advocate for the center's closure, saying reports of conditions were "completely unacceptable."

DHS flatly denied the claims, calling them "a political stunt by New Jersey sanctuary politicians" and stating there is "NO hunger strike" and "NO subprime conditions" at the facility. Protesters were seen blocking unmarked government vehicles, and video showed a skirmish with ICE agents. Visitation was suspended by DHS "out of an abundance of caution" following the clashes.

Ukraine News

Russia Threatens New Mass Attacks on Kyiv; Lavrov Calls Rubio to Warn of Strikes on 'Decision-Making Centers'

Russia announced it will launch systematic strikes on Kyiv's "decision-making centers," framing the planned attacks as retaliation for Ukraine's recent strike in Russian-controlled Luhansk. Foreign Minister Sergey Lavrov called Secretary of State Marco Rubio on May 25 to formally warn of the upcoming bombardment and urged the U.S. to evacuate its diplomatic personnel from Kyiv. The EU vowed its diplomats would stay.

The threat came just after Russia's devastating May 24 missile and drone attack on Kyiv — which used an Oreshnik hypersonic ballistic missile capable of carrying a nuclear warhead — killing at least two people, injuring 87, and damaging around 300 sites including nearly 150 residential buildings. Ukraine's air defenses neutralized 246 of 262 Russian drones launched since the evening of May 24.

Separately, Putin signed legislation authorizing the use of military force abroad to "protect Russian citizens" facing foreign arrest or prosecution — a measure condemned internationally as a potential pretext for military incursions against neighboring states.

EU Loan Package Critical to Ukraine's War Effort; Frontline Fighting Continues

An EU loan package — expected to cover about two-thirds of Ukraine's funding needs in 2026 and 2027 — is seen as critical to Ukraine's ability to sustain both basic state functions and its military effort against Russian forces. Without the package, officials warned Kyiv could have run out of resources to sustain the war as early as this year.

On the battlefield, Russian forces launched 753 strikes on 48 settlements in the Zaporizhzhia

region in the past 24 hours. Heavy fighting was reported on the Pokrovsk and Huliaipole axes, with 233 combat engagements recorded on May 24. Ukraine's Black Forest Brigade destroyed a rare Russian 5N63S radar station using attack drones. Russian forces also struck a hospital in Bilozerka in the Kherson region on the morning of May 25.

Vietnamese News

Vietnam Breaks into World's Top 10 Crude Steel Producers for First Time

Vietnam has entered the world's top 10 crude steel producers for the first time, marking a major milestone for its fast-growing industrial sector. In April, Vietnam's crude steel output reached 2.1 million tonnes, up 4% year-on-year, according to the World Steel Association. The result allowed Vietnam to surpass Italy and secure a place among the world's ten largest producers — a sign of the country's accelerating heavy industrial base.

PM Le Minh Hung Pushes Major Shift Toward Rental Housing; General Secretary To Lam to Visit Singapore and Thailand

Prime Minister Le Minh Hung chaired a working session on May 25 with the Hanoi People's Committee to push a fundamental restructuring of the housing market — from a model dominated by commercial housing sales to one that develops rental housing as a strategic long-term segment to serve broad public demand.

Meanwhile, General Secretary and State President To Lam is scheduled to pay a state visit to Singapore from May 29-31, where he will attend and deliver a keynote address at the IISS Shangri-La Dialogue, one of the most important security forums in the Asia-Pacific region. He is also set to visit Thailand from May 27-29, retracing Ho Chi Minh's historic footsteps in northeastern Thailand.

Separately, Vietnam's Deputy Foreign Minister Le Thi Thu Hang met with CNN International Commercial executives on May 25 to discuss media cooperation and plans for Vietnam-hosted APEC 2027.

Hanoi Hits 40.7°C as Severe Heat Wave Grips Northern and Central Vietnam

Hanoi recorded a sweltering temperature of 40.7 degrees Celsius on May 25 as a severe heat wave spread across northern and central Vietnam. Forecasters warn the dangerous conditions are expected to persist through May 28. Authorities have urged residents to limit outdoor activity during peak afternoon hours and have issued health advisories for vulnerable populations.

Financial and Stock News

Futures Jump on Iran Peace Optimism as U.S. Markets Reopen After Memorial Day

U.S. stock futures jumped early Tuesday — the first trading day after the Memorial Day holiday — as oil prices fell sharply and investors grew more hopeful that a resolution to the U.S.-Iran war was within reach. Dow futures gained 319 points (0.63%), S&P 500 futures rose 0.65%, and Nasdaq-100 futures advanced 0.87%.

President Trump said on Monday that Iran talks were "proceeding nicely," while Fox News

reported the deal was "95% there" — even as U.S. forces conducted fresh self-defense strikes near the Strait of Hormuz overnight. West Texas Intermediate crude fell more than 5% to around \$91.33 a barrel, extending last week's 8.4% drop, its worst week since April. Analysts noted that with earnings projected to grow 23% in 2026 and 16% in 2027, fundamental support for equities remains strong alongside the peace deal optimism.

On Fed policy, traders are now pricing in an 8.5% chance of a rate hike in July — up from just 0.9% a month ago — as sticky inflation from high energy prices complicates the Federal Reserve's path, even as new Chair Kevin Warsh takes the helm.

SMCI Securities Class Action Deadline Today; Stock Slides on Export Control Scrutiny

Today, May 26, is the application deadline for multiple securities class action lawsuits filed against Super Micro Computer (SMCI), which allege investors were harmed by the company's failure to disclose alleged violations of U.S. export control laws. Law firms including Rosen, Faruqi & Faruqi, Robbins LLP, and Kahn Swick & Foti have all sent deadline notices to SMCI shareholders.

The legal pressure adds to the company's existing challenges: Taiwan is reportedly probing a \$2.5 billion Nvidia chip-smuggling scandal implicating the company, and Nvidia CEO Jensen Huang has reportedly warned Super Micro as AI chip smuggling scrutiny grows. Despite the headwinds, SMCI's most recent quarterly earnings beat estimates by 36%, and AI server demand remains robust.

THE WEATHER

Today brings cloudy skies, a high of 27°C and a low of 15°C. Thunderstorms throughout **tomorrow**, between 18°C and 29°C. Storms develop overnight.
